

Ohio Oil & Gas Energy Education Program

CAREERS IN OHIO SERIES: ENGINEERING TECHNICIAN

Job Description:

Assist various types of engineers with technical tasks/
data management.

Typical Education:

Associate's Degree;
Bachelor's Degree Preferred
(Math, Science or related field)

Education & Training Facilities:

Belmont College

120 Fox Shannon Place, Saint Clairsville, Ohio 43950
740-695-9500

FACTS

ABOUT OHIO'S OIL & GAS INDUSTRY

Working in Ohio's natural gas and crude oil industry can offer a challenging and rewarding career. Individuals that choose this career path, whether in an office or field environment, are accustomed to working long hours and operating under adverse weather conditions.

Ohio's first wells were drilled just prior to the Civil War using hollowed out tree trunks as our first casing and natural gas pipelines. Today, we continue to provide energy and products to farms, homes, schools, churches, municipalities and businesses across the state. Ohio ranks fourth in the nation in the number of natural gas and crude oil wells

drilled—275,000—behind only Texas, Oklahoma and Pennsylvania. Today, there are over 65,000 active wells across the state producing out of 30 different geological formations.

Advancements in technology make it possible for natural gas and crude oil producers to safely and economically drill in rural and pre-developed areas. Ohio's supply of natural energy resources is indeed significant. As the state's supply adds to the national supply, our resources are helping us to be more independent from foreign energy supplies.
