

OHIO

SHALE GAS CAN LEAD TO NEW INVESTMENT, JOBS, WAGES AND TAX REVENUE FOR OHIO

Access to vast, new supplies of natural gas from shale deposits is one of the most dramatic domestic energy developments in the last 50 years. The economics of shale gas not only create a competitive advantage for U.S. petrochemical manufacturers, but also lead to greater U.S. investment and industry growth.

A **\$3.2 BILLION** investment in an ethylene production complex in Ohio will generate a total of **\$7.5 BILLION** in additional chemical industry output, bringing the state's industry revenues to more than **\$39 BILLION** and making it the country's **5th largest chemical producing state**.

In Ohio, more than **17,000 permanent jobs** will be created in the chemical industry and throughout the supply chain in everything from trade and craft jobs to highly-skilled knowledge workers.

More than **\$1 BILLION** in wages will go into the pockets of Ohio workers, generating nearly **\$169 MILLION** in state tax revenue and more than **\$200 MILLION** in federal revenue.

INVESTMENT PHASE

(building the facility)

\$1.6 billion industry revenue

12,000 American jobs

\$58 million in Ohio tax revenue

\$575 million in worker wages

OPERATION PHASE

(ongoing production)

\$7.5 billion in industry revenue

17,000 American jobs

\$169 million in Ohio tax revenue

\$1 billion in worker wages

WHY OHIO?

\$32 billion in revenue

and more than **43,000** Ohio jobs

considerable shale gas deposits

access to the Great Lakes

within 500 miles of U.S. industrial base

excellent universities

major rail systems
